DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

This application is in condition for allowance except for the presence of claims 10-12 directed to group II non-elected without traverse. Accordingly, claims 10-12[✓] have been cancelled.

Election/Restrictions

Applicant's election without traverse of claims 1-9 in the reply filed on 04/28/2006 is acknowledged.

Drawings

Applicant's drawing submission of 16 replacement drawings on February 11, 2004 is hereby entered to replace the drawings submitted on October 20, 2003

Allowable Subject Matter

Claims 1-9 are allowed. The following is an examiner's statement of reasons for allowance: Rouquette (U.S. Pub. No. 20030117025) teaches a power feeding branching device (see figs. 3-9) comprising: Rouquette teaches the use of power conversion circuitry (item 50) wherein a first output terminal (see V6 exiting right of item 50) and a second output (see terminals outputting V4 and V3) terminal which is electrically isolated from both said input terminal and said first output terminal; Farrar (U.S. Pat. No. 6,275,396) teaches a controller (not shown see column 2 lines 50-67) connected to said constant current-constant current converter for controlling the operation of the conversion circuitry. Neither Rouquette nor Farrar teaches the use or the output of a restored first constant current, which is to be supplied to said second output terminal. This further limitation to claim 1 is not found or rendered obvious by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Appleford et al. (U.S. Pat. No. 6,873,063), Farrar (U.S. Pat. No.

Art Unit: 2835

6,275,396) and Farrar (U.S. Pub. No. 20030231516) all teach similar devices relevant to the claimed invention.
